Our Certification

With NPT Smarthome, your life would become more convenient and comfortable.

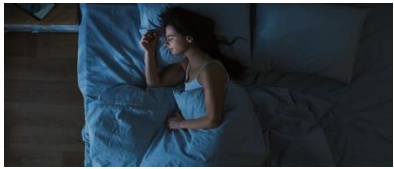

Breakfast
While dressing, you hear the coffee machine start to smash the coffee bean. After 5 minutes, a wonderful smell of fresh coffee is caught by your nose. Also, the sliced bread is pop up from the toaster. Time to enjoy your breakfast!

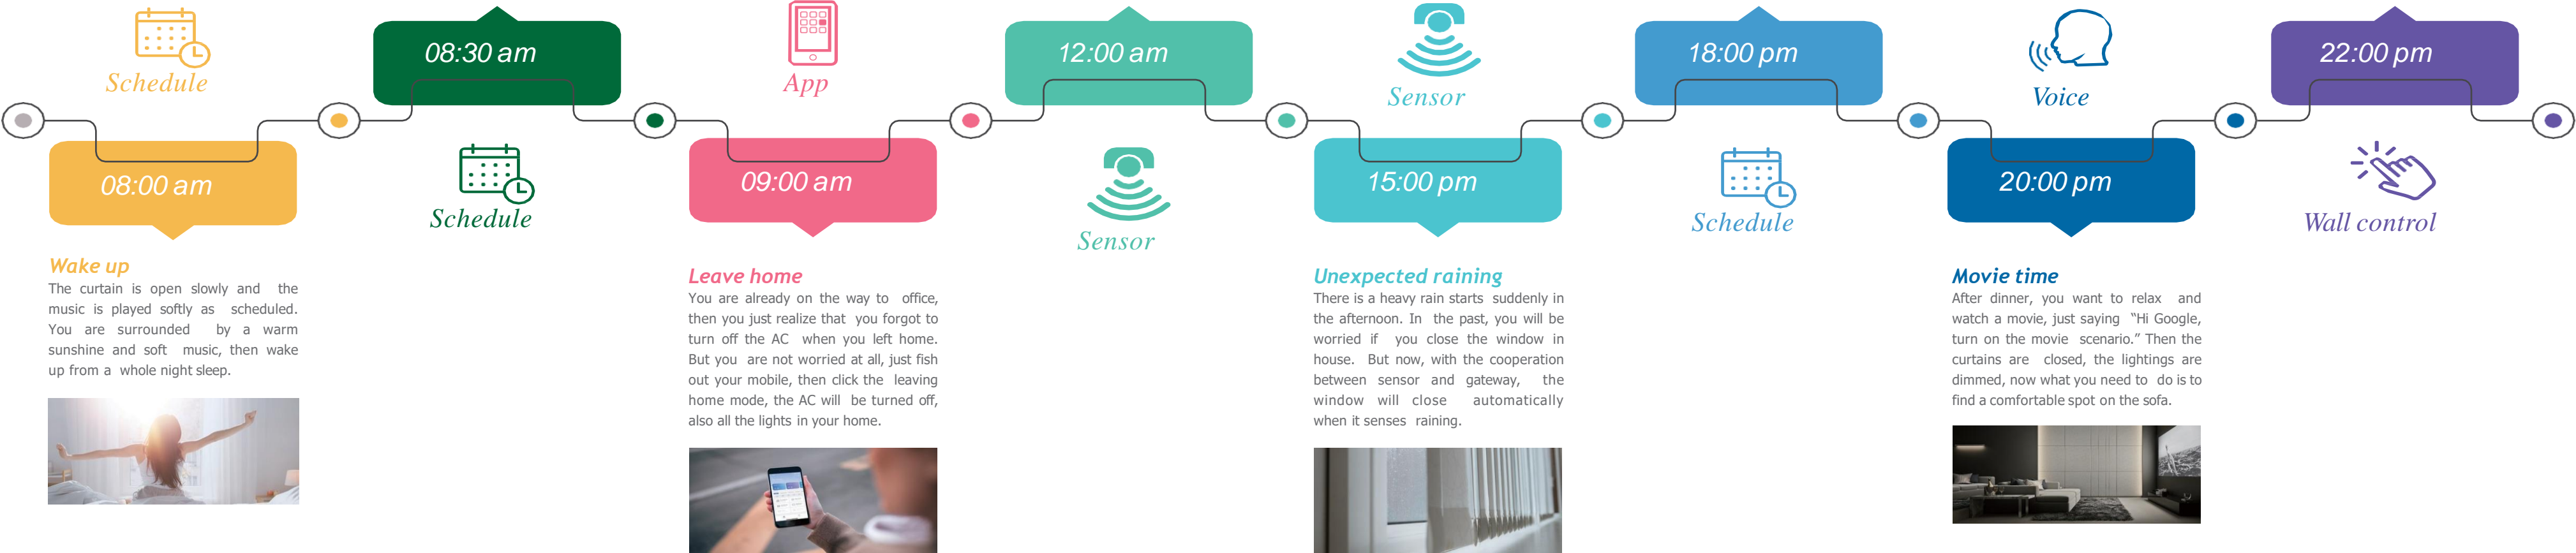

Security alarm
An alert is shown on your phone, saying the window of balcony is open. By switching to the camera, and open real-time monitoring video, you find out that is neighbor's cat came to visit your cat. You are relieved.

Back home
Working in such a hot weather makes people irritable, now you want to back home as soon as possible. The moment you enter the room, you feel cool and comfortable. Because the AC has already started to perform before you arrive home.

Bed time
It is nearly the end of the day, time to go to bed. By laying on the bed, you press the "Sleep Mode" switch near your bed. All the lights are off, AC will adjust the temperature by itself to make you feel comfortable meanwhile saving energy. Sweet dream!

SMART GATEWAY

Life lives, and the living flows, no questions are raised

Communication

The Zigbee devices creates a strong mesh network for home automation. That mesh helps us to cover all the home, or any installation with only one gateway. Doesn't matter how far is the last element from the origin due the different elements helps to bounce the information until arrive to the gateway.

The recent addition of Zigbee 3.0 created a unified standard to led all devices to work together.

Everything starts with the gateway

The gateway is:

- The control center of smart home.
- The bridge between the local installation and the cloud.
- Based on Zigbee3.0 protocol.
- OTA, free upgrade for lifetime.
- The key for a remote control.
- Local service will continue when the artwork down.
- Able to support the interconnection of 3rd party devices.
- Equipped with AES secure encryption to fully protect your privacy.
